

---

Universal Accounting is a small but powerful accounting software that works with different databases: Xbase, CSV, MySQL, and Firebird. This software gives you a full control of all your accounts: Accounts management (Income, Expenses, and Assets), Balance sheet (Retained Earnings, Current Assets, Current Liabilities, and Equity), Expense Reports, Invoice/Payment Reports, Accounts Payable, P&L, and Inventory. You can build different reports with different databases, even creating your own reports, in order to have a better control on your data. Universal Accounting is compatible with all big accounts, such as Paypal, Cash Management, Google Wallet, and so on. Universal Accounting supports export to different files such as CSV, XBase, SQL, and many others. An attachment system allows you to save the document to your hard disk. The attachment system supports more than 20 file types (with compressions), and you can manage the attachments using an advanced dashboard. Universal Accounting offers an automatic backup system for working files. The files are saved in the internal memory, and you can always recover them. Universal Accounting has many reports, such as Transaction reports (All transactions, Client reports, P&L by client), Balance sheet, Income and Expenses reports, Debtors and Creditors reports, and Inventory reports. You can easily set up your own reports and save them. Universal Accounting has a calendar system, which allows you to know the payments and transactions of your clients and their salaries. In this way, you can easily keep track of all your clients payments. Universal Accounting allows you to create different types of invoices. For example, you can create an invoice as an estimate invoice, or a one-time invoice, or invoice for service, or invoice for product. You can also create different invoice variations, or estimate a payment request. This software can create different payment methods, such as bank transfers, credit cards, virtual and real banks transfers, cash advance, cash advance from your bank, and a lot more. Universal Accounting allows you to work with credit cards, accounts and bank transfers, and so on. This software is compatible with all major operating systems, such as: Windows 8.x, Windows 7, Vista, Windows XP, Windows Vista, Windows Server 2003, Windows 2000, and Mac OS X 10.x. Universal Accounting Availability: Universal Accounting is a freeware, which means that it's an open source 2cb456ebb3
