What's New in the AB-Edit?

AB-Edit is a desktop text editor for Mac OS X and Windows. AB-Edit is based on components of text editors mentioned under GNU License in the GNU General Public License wiki. Especially, it is based on KATE, a very useful text editor for Linux, written by Bijan Zolfaghari, and the UNICODEEDIT text editor by St. Joseph's Regional Medical Center, New York, written by Rich Mansfield. Category:Unix text editors Category:MacOS text editors Category:Windows text editors Q: Is a user's badge amount affected when they have a new private P.SE account? See How does the "Silver" user badge affect my reputation? and Can I earn that badge again?. The answer to the latter question seems to imply that it would, since the amount of reputation is 2,000 less on the one account and two less on the new account. However, the badge description text mentions only that a user can earn "X Points" for "Y consecutive days". However, if someone creates a new account, is there any way to count those days as 'consecutive'? Or would the badge just count everything (including when the user lost the original account). A: Yes, the silver badge is affected by having a new account on another network. You may earn this badge once per site that you earn at least 200 reputation points on. For each consecutive day you earn at least 200 reputation, you earn 1 silver badge. A: A user is only counted as a day once, so if he has a new account, every account he is on is recorded as a single day. However, that is not explicitly stated. IMHO, as a community moderator, it should be stated explicitly somewhere in the about page, so that users are aware of the behavior of SE. I also think that it is a bug to have the message on the about page. See a previous meta.SE discussion.
