Luckily, this is not the case. I've been playing around with makeup today and tonight is the night that I share with you what I've been trying. First, though, is the full daily makeup routine I use on a daily basis (plus in the pics). Rhythmic locomotor activity in rats after guanethidine-induced sympathectomy. The locomotor activity of rats was continuously recorded before and after guanethidine (GN) treatment in order to describe the influence of the denervation of the spinal sympathetic nervous system on the temporal organization of the daily locomotor activity.
